

# MOUNTAIN LAUREL MEDICAL CENTER

Mountain Laurel Medical Center is accepting new patients. This community health center is available for routine healthcare needs for students requiring medical care but unable to access their Primary Care Provider while living in Garrett County.

We are also available to any local students needing a Primary Care Provider or for any student experiencing a new medical problem. Visits will be prioritized for those needing continuity of care for an ongoing medical problem that needs regular follow up appointments during the school year. However, Mountain Laurel Medical Center also has appointments for acute medical care needs throughout the week.

For students unable to reach our locations in Grantsville and Oakland, we are offering **telemedicine visits**.

-Examples of the types of *chronic health issues* that can be addressed over telemedicine visits include asthma, migraines, chronic allergies, elevated blood pressure, mood disorders, and diabetes. These are medical problems that may require medication management, refills, education, or therapy sessions.

Common *acute medical issues* and symptoms that can be addressed via telemedicine include colds and flu, allergies, urinary tract infections, sinus infections, rashes, nausea, diarrhea, insect bites, and stomach problems.

-If a medical issue cannot be adequately addressed over a telemedicine visit, Mountain Laurel Medical Center will arrange for an appointment at one of our three locations.

**Call for an appointment: 301-533-3300**

- \*There are standard paperwork and forms to complete before an appointment can be scheduled, so please call ahead to arrange to complete all necessary paperwork first.
- \*Please identify yourself as a Garrett College student when you call to schedule an appointment
